NCSC AUTHORISATION

Service:	Secure Destruction
Company:	Restore Technology
Service Requirement:	CAS - Sanitisation v2.1
Certificate Number:	264868406-2248

This is to certify that the Restore Technology Secure Destruction Service (*including the service formerly provided by Euro Recycling, which is now part of Restore Technology*) has been examined under the NCSC CAS scheme and has been successfully verified against the Sanitisation Service Requirement Version 2.1.

The scope of the service assessment and approval is given overleaf.

Certification is subject to the terms of this letter.

Arrangements will be made to present a formal Certificate for display purposes - further copies will be available on request. An entry for this Service will also be published on the NCSC website.

AUTHORISED BY

**DIRECTOR GENERAL
CYBER SECURITY**

STATEMENT OF FUNCTIONALITY

Restore Technology – Secure Destruction

1. Service Provision:

Certification will only be valid when delivered in line with the end-to-end processes witnessed during the Assessment.

2. Service Versions:

The latest available version of the Service should be provided. In addition to the version evaluated, later versions of the Service are automatically covered by this certification (until certificate expiry as stated on the face of the certificate) provided the Service continues to be maintained in line with its Assurance Maintenance Plan, as agreed with the NCSC.

3. Additional Points:

Certification will only be valid when delivered by the approved members of the Service Provider team, as detailed in the Assessment Report.

Certification will only be valid while clearances and certifications which support the Secure Destruction Services continue to be valid. This will include the valid clearances of all staff delivering the services, and also the continuing valid certification of equipment and facilities, as detailed in the Assessment Report.

Due to the scope of the CAS scheme, the certification of this Service does not cover the destruction and disposal of cryptographic items, as defined within IS4 - Protective Security Controls for the Handling and Management of Cryptographic Items.

4. Certificate scope

Dynamic and Static RAM (DRAM and SRAM)	TOP SECRET and below
EEPROM and EPROM	TOP SECRET and below
Flash	TOP SECRET and below
FPGA (Volatile and non-volatile)	TOP SECRET and below
